

You could harness LLMs to  
create advanced agents.

You could do it today!

But *should* you?

```
library(ellmer)
```

```
chat <- chat_openai(  
  "Be concise",  
  model = "claude-3-7-sonnet-latest"  
)
```

```
chat$chat("Why is the sky blue?")
```

```
library(ellmer)

chat <- chat_openai(
  "Be concise",
  model = "claude-3-7-sonnet-latest"
)

chat$chat("Why is the sky blue?")
```

You could harness LLMs to create advanced agents.

You could do it today!

But *should* you?
